

# Service Bulletin 23

June 7, 1961

TO ALL DEALERS AND DISTRIBUTORS

SUBJECT: 5003 and 5010 Transmissions

All tractors and replacement transmissions produced previous to tractor Serial No. 11628, contain Part No. 3521 Spline Shafts with 10 straight sided splines and matching gears, Part Nos. 3523, 3524 and 3526.

All tractors and replacement transmissions produced after tractor serial number 11628, contain Part No. 3521 Spline Shafts with 11 involute tooth form splines and matching gears, Part Nos. 3523, 3524 and 3526. The matching gears for the two types of Spline Shafts are NOT inter-changeable although the part numbers are identical.

It is suggested that, when ordering the #3523 High and Second Gear, the #3524 Low and Reverse Gear or the #3526 Splined Pinion Gear, the number of Splines on the #3521 Spline Shaft be noted on your Purchase Order. This will eliminate the possibility of receiving gears which will not assemble on the Spline Shaft.

The ordering of the #3521 Spline Shafts should be handled in the same manner.
