77

OCTOBER 1966

SUBJECT: TUBELESS TIRES

- I. We have receive many inquiries regarding filling tubeless tires with calcium chloride. It is not necessary to install inner tubes for this purpose. Inner tubes, however, are now available through our Parts Department should a customer insist on their installation.
- II. We have also been receiving, for warranty replacement, rear tubeless tires and wheel assemblies from tractors and lawn rangers which were leaking between the tire and rim. Such assemblies will no longer be accepted at the factory.

Effective immediately, tubeless tires will be repaired in the field utilizing the proper inner tube. Credit for the tube and installation labor will be issued from the warranty claim report. Flat Labor Rate \$1.75.

USAGE

#5434 Tractor Tire
#5568 Ranger Tire

Use #7007 Tube
Use #6967 Tube

\$8.95 List
9.00 List
